2.

$$6 + 4 + 7 =$$

2.

$$6 + 4 + 7 = 17$$

A diagram illustrating the addition of three numbers. The equation $6 + 4 + 7 = 17$ is shown. The numbers 6 and 4 are blue, while the others are black. The result 17 is red. Below the first two terms, the number 10 is written in black. Two blue arrows point from the number 10 to the numbers 6 and 4, indicating that their sum is 10.

3.

$$3 + 7 + 7 =$$

3.

The diagram illustrates a two-step addition process. It starts with the equation $3 + 7 + 7 = 17$. The numbers 3 and 7 are highlighted in blue. Below the 3 and 7, the number 10 is written. Two blue arrows point from the 10 up to the 3 and the 7, indicating that their sum is 10. The final result, 17, is written in red.

$$3 + 7 + 7 = 17$$

4.

$$6 + 4 + 5 =$$

4.

$$6 + 4 + 5 = 15$$

10

The diagram illustrates the addition process. Two blue arrows originate from the number 10, pointing upwards to the numbers 6 and 4 in the equation above. This indicates that 6 and 4 are being added together to form 10. The final result of the entire equation, 15, is shown in red.
